

Know your nosings...

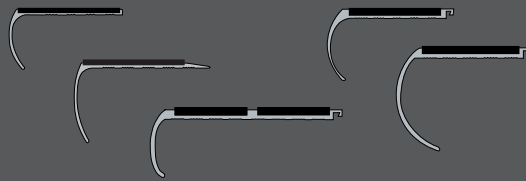

...A simple users guide

All these nosings, which do I choose?

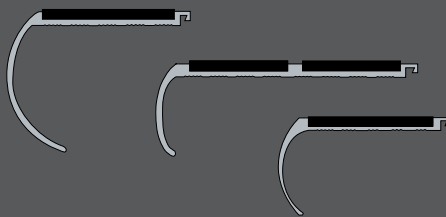

Easy, what shape is the step?

It's a bullnose

And what is going on the floor?

Carpet

And what type of building?

A school

Here you go...

Genesis
For the Perfect Finish

Three simple questions for the best nosing to suit your installation...

1. What floor covering is being used?

Carpet

Vinyl

Tile / Laminate

None

2. What shape is the step?

It is important to select the correct nosing for the shape of the step. The nosing selected should be a tight fit to the step underneath to ensure the profile does not slip or rock during use.

Straight

Rakeback

Bullnose

3. What is the level of traffic?

The volume of traffic on stairs will determine the nosing to select. Heavier gauge nosings, with double channels, should be used when steps are in heavy traffic areas. e.g. railway stations, supermarkets, department stores, schools and hospitals.

Standard

Heavy
